"Crack This, Crack TCS NQT – The Ultimate Challenge Awaits!"

Concept :

Question 86 :

A sum becomes 29 times of itself when invested for 56 years at r% simple interest per annum. Find the compound interest earned if Rs.80,000 is invested at r% per annum when interest is compounded half yearly, for 1 year.

A. 36000
B. 40000
C. 45000
D. 125000.
E. None of the

Question 87 :

A sum of Rs 20000 becomes Rs 32000 in 12 years, when invested in a scheme of simple interest. If the same sum is invested in a scheme of compound interest with same yearly interest rate (compounding of interest is done yearly), then what will be the amount (in Rs) after 2 years?

A. 21750
B. 22050
C. 23250
D. 24650
E. None of thes

Question 88:

The difference between Simple interest and compound interest earned on sum of Rs.2500 invested for 2 years was Rs. 225. Find the rate at which sum was invested annually?

2 वर्षों के लिए निवेशित 2500 रुपये की साधारण व्याज और चक्रवृद्धि ब्याज के रुपये था। वह दर ज्ञात कीजिये जिस पर + गया था?

राशि पर अर्जित बीच का अंतर 225 सालाना निवेश किया

A. 25%

B. 30%

C. 55%

D. 35%

E. 24

Question 89:

A sum of money invested at compound interest amounts to 800 in 3 years and 882 in 5 years. What is the rate of interest?

1) 2.5%
2) 4%
3) 5%
4) 6.66%
5) 5) None of these

Question 90 :

A sum of money invested at compound interest amounts to 800 in 3 years and to 840 in 4 years. What is the rate of interest per annum?

1) 2.5%
2) 4%
3) 5%
4) 6.66%
5) None of these

Concept :

Question 91 :

The amount received when Rs. 1600 is invested at r% p.a. compound interest, compounded annually for 2 years, is Rs.3600. Find the simple interest received when Rs.2200 is invested at (r-20)%p.a. for 8 years.

1600 रुपये प्रति वर्ष r% पर निवेश किए जाने पर प्राप्त राशि। चक्रवृद्धि ब्याज, 2 साल के लिए सालाना चक्रवृद्धि, 3600 रुपये है 2200 रुपये (r - 20% प्रति वर्ष की दर से निवेश करने पर प्राप्त साधारण ब्याज ज्ञात कीजिए। 8 साल के लिए

A. Rs.3200
B. Rs. 5280
C. Rs. 4850
D. Rs.3500

Question 92 :

A man had ₹16,000, part of which he lent at 4% and the rest at 5% per annum simple interest. If the total interest received was ₹700 in one year, the money lent at 4% per annum was

A. ₹12,000
B. ₹8,000
C. ₹10,000
D. ₹6,000

Question 93:

Meghna had Rs. 3000 with her. She invested Rs. 'x' at 30% p.a. simple interest for 5 years and remaining sum at 50% p.a. compound interest, compounded annually for 2 years. If the total interest received by her is Rs. 4050, then find the value of 'x',

मेघना के पास 3000 रुपये थे। उसने 30% प्रति वर्ष की दर से 'x' रुपये का निवेश किया। 5 वर्षों के लिए साधारण ब्याज और शेष राशि 50% प्रति वर्ष । चक्रवृद्धि ब्याज, 2 साल के लिए सालाना चक्रवृद्धि। यदि उसके द्वारा प्राप्त कुल ब्याज 4050 रुपये है, तो " का मान ज्ञात कीजिए।

A. 1000

B. 1500

C. 1200

D. 750

Question 94:

Mantu invested Rs. x in scheme 'A offering 10% p.a. simple interest, for 6 years. He then invested 80% of the interest received from scheme A, in scheme B' 1 offering 10% p.a. compound interest, compounded annually, for 2 years. If the interest received by him from scheme B is Rs. 5040 then find the value of ‘x.

A. 45000
B. 50000
C. 55000
D. 60000
E. None of these

Question 95 :

A man wants to invest Rs. 16850 in bank account of his 2 sons, whose ages are 12 years & 16 years in such a way so that they will get equal amount at an age of 120 years at the rate of $33\frac{1}{3}\%$ compounded annually. Find the share of younger son?

(a) 4050

(b) 4080

(c) 4090

(d) 4085

Question 96 :

The simple interest (p.a.) accrued on an amount of Rs 17,000 at the end of four years is Rs 6,800. What would be the compound interest (compounded annually) accrued on the same amount at the same rate in two years?

(A) Rs 3260

(B) Rs 3570

(C) Rs 3780

(D) Rs 3980

(E) Cannot be determined

Question 97 :

The simple interest accrued on an amount of Rs. 22,500 at the end of four years is Rs. 10,800. What would be the compound interest accrued on the same amount at the same rate of interest at the end of two years?

(a) Rs. 16,908

(b) Rs. 5,724

(c) Rs. 28,224

(d) Rs. 8,586

(e) Rs. 5424

Installment _ C.I

Concept :

Installment _ C.I

Question 98 :

A man purchases a motor bike for a certain price and promise to pay the price in two equal annual instalment of Rs.13230 at the rate of 5% per annum compounded annually. Find the cost price of motor bike.

A. 24600
B. 25600
C. 23899
D. NOT

Question 99:

A sum of Rs 1100 was taken as a loan . This is to be repaid in two equal installments. If the rate of interest be 20% compounded annually, then the value of each installment ?

1. Rs 842
2. Rs 792
3. Rs 720
4. Rs 700

Question 100:

A mobile phone is available for 79,860 by cash payment or by paying cash of 60,000 as down payment and the remaining amount in three equal annual instalments.

If the shopkeeper charges interest at the rate of 10% per annum compounded annually, then the amount of each instalment (in) will be:

A. 7986
B. 6789
C. 6689
D. 6000

Fundamental

NOTE:

1.PRINCIPAL = 100%

2. Amount = Principal + Interest

3.Interest = Rate(r) * Time(t)

Question :

A Certain sum of money is borrowed by a person at 3% Simple Interest for 4 years. If he has to pay Rs. 120 as interest , find the total amount he has to pay

(a) Rs. 1020 (b) Rs. 820

(C) Rs. 1120 (d) Rs. 1220

Foundation

Question :

The simple interest obtained on a certain amount at 7.5% p.a. for two years is 232.50. What is the amount invested?

1) 2000
2) 1575
3) 1659
4) 1600
5) None of these

Concept :

Foundation

Question :

Find the compound interest on Rs 4000 for 3 years at 5 per cent per annum.

A. Rs 630

B. Rs 630.50

C. Rs 620.50

D. None of these

Foundation

A certain sum becomes Rs. 1020 in 5 years and Rs. 1200 in 8 years at simple interest. What is the value of principal?

Rs. 820 (2) Rs. 780 (3) Rs. 700 (4) Rs. 720

A sum of money amounts to 5,200 in 5 years and to 5,680 in 7 years at simple interest. The rate of interest per annum is

(1) 3% (2) 4% (3) 5% (4) 6%

Foundation

Question :

Nitesh borrowed some money at the rate of 6% p.a. for the first three years, 9% p.a. for the next five years and 13% p.a. for the period beyond eight years. If the total interest paid by him at the end of eleven years is Rs.8160, the money borrowed by him (in Rs.) was
